- Sulfites are not added to any item, however, items may contain naturally occurring sulfites.
- SOY ALLERGY: We use Duke's Mayonnaise in our chicken salad - although highly-refined soybean oil is listed as an ingredient of the mayo, the process the soybean oil goes through removes the soy protein (which is the source of the allergen). The Food Allergen Labeling & Consumer Protection Act (FALCPA) exempts highly-refined oils from the new source labeling provisions because highly refined soybean oils have been clinically documented to be safe for consumption by individuals allergic to soy.
